

Unlock your industrial potential

/CASE STUDY **FOOD**
INDUSTRY

TeepTrak has been supporting Nutriset in the fight against malnutrition since 2016

For more than 30 years, Nutriset has built unique expertise in combating malnutrition. With 10 partners across 10 countries, the group focuses its operations on three major areas: research, production, and the distribution of therapeutic foods to deliver targeted solutions.

constantly updated and tailored for vulnerable populations. The company decided to speed up its digital transformation and eliminate paper-based tracking to boost performance and allow teams to refocus on high-value tasks.

Challenges

01. Eliminate paper-based record keeping and overcome limited resources for processing performance data
02. Adopt an external solution that can be quickly implemented without stopping production
03. Gain greater visual insights, especially by displaying data on large screens
04. Enhance workplace

Implementation and Impact

By switching to Perftrak and Monitrak, Nutriset moved away from manual reporting to a user-friendly solution that delivers real-time data to both operators and managers. Teams quickly adopted these tools, which now support their daily tasks and enhance workplace wellbeing.

Nutriset saw ROI within just one month, and this rollout led to a significant boost in productivity and cost stability, helping make Nutriset products accessible to more people.

Today, the Malaunay site is equipped with 22 Perftrak solutions and 7 Monitrak systems (real-time monitoring on large screens) throughout the facility. This transformation has actively involved frontline teams in the process of continuous improvement, providing them with reliable and truly useful information.

RETURN ON INVESTMENT <1 MONTH

"Nutriset's return on investment was remarkably fast, as we managed to eliminate most of what we call 'irritants' those brief 3-4 second stoppages that can happen fifty or even a hundred times per shift."

Sylvain Clausse, Maintenance and Automation Department, Nutriset

Trusted by Leading Partners

Our systems are in place at nearly 150 factories, from small businesses to major corporations, across a range of industries.
